24/7 RapiDetect Monitoring

Monitoring Services

Reactive CCTV Monitoring

Using motion detection or video analytics, we can respond to activations at your site, issue audio warnings and request police response where required. We are on the forefront of testing new technologies.

Live CCTV Monitoring

From our purpose-built ARC/RVRC, we can monitor your systems 24 hours a day, 365 days a year with access to live images. We also have a secure web and mobile portal, where you can check the live feeds yourself.

Visually Verified Monitoring

As well as offering standard intruder and fire monitoring, we can offer a visual confirmation of these alarms. Drastically reducing false activations and your chances of losing your URN.

Intruder Alarm Monitoring

These are grade 2 alarm certified solutions giving additional peace of mind and protection along with visual verification and home automation.
